	<p>It was such a useful and well-taught course!! The course was designed to make sure we really understood the basics of digital images from the very beginning, which was something that I've been lacking and have never found elsewhere before!! Dr. Lorenz was very thorough in his explanations and was always willing and able to clarify our questions. I also really liked the way that he would ask us different questions to really make sure we understood the concept – that was super useful!! The exercises that accompany the lectures made the points much clearer and allows us to familiarise ourselves with the software. It was SUCH a useful course – I'd recommend it for everybody who needs to work with digital images!!</p>										
	<p>Excellent course! Nice teachers! I would love to do the second course. At the end it was a bit too much input, but still it is hard to cover such a big topic in such a short time. Great job!</p>										
	<p>Most definitely the best course I had so far in terms of clarity. It is actually unbelievable how many topics we went through while going from the very basics. Eerythings was connected to things we deal with every day in the lab and also further help was offered to us. I also very much appreciate that computers</p>										
	<p>If feasible, it might be a good idea to increase the course duration to 3 days in order to discuss more advanced applications a bit more thouroughly.</p>
