

ZMBH Seminar

Wednesday, 21.06.06 – Room 001

- 10.00 h **Dr. Johannes Bauer**
Dept. of Mol. Biology, Cell Biology and Biochemistry, Brown University, Providence
"New tricks of an old molecule: p53 and life span regulation"
- 10.40 h **Dr. Paul Chastain**
Dept. of Pathology and Lab Medicine, University of North Carolina, Chapel Hill
"Alteration of Replication Dynamics during Replicative Stress"
- 11.20 h **Dr. Gawain McColl**
Buck Institute for Age Research
"Investigating the molecular mechanisms of ageing in *C. elegans*"
- 12.00 h Lunch Break
- 14.30 h **Dr. Takashi Hiiragi**
Max-Planck-Institut für Immunbiologie, Freiburg
"Mechanism of first polarity establishment in the mouse embryo"
- 15.10 h **Dr. Tilman Sánchez-Elsner**
Centro de Investigaciones Biológicas, Madrid
"Noncoding RNAs and chromatin modification in development"
- 15.50 h **Dr. Edgar Kramer**
Max-Planck-Institut für Neurobiologie, Martinsried
"Ret function in motor neuron axon guidance and in maintaining the dopaminergic systems"
- 16.30 h Coffee Break
- 16.45 h **Dr. Marcus Fändrich**
Leibniz-Institut für Altersforschung, Jena
"Structure and formation of amyloid fibrils"
- 17.25 h **Dr. Manuel Than**
Max-Planck-Institut für Biochemie, Martinsried
"Crystal Structures in Biomedical Research: Molecular Players in Protein Activation and in Alzheimer's Disease"

Guests are welcome!

Prof. Dr. Bernd Bukau
